Mohamed Fares

Full-Stack Developer

mohamed.fares.developer@gmail.com • 01156654953 • Giza, Egypt

Portfolio: mohamedfares.dev • github.com/mohamed1fares • linkedin.com/in/mohamed-fares-ismail

PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Science senior specializing in the MEAN stack (MongoDB, Express.js, Angular, Node.js) with hands-on experience in full-lifecycle application development. Led the backend development of VulnCraft, a cybersecurity platform that secured 3rd place in Africa at the Huawei ICT Competition. Architected scalable web applications, robust server-side infrastructures, and e-commerce platforms. Designed clean RESTful APIs, optimized complex database queries, and managed full-cycle deployments to deliver highly responsive software solutions.

SKILLS

Frontend Development: Angular (v20), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Responsive Design, User Interfaces

Backend Development: Node.js, Express.js, RESTful APIs, Authentication (JWT, OAuth)

Database: MongoDB, Mongoose, SQL, NoSQL, Database Design & Optimization

Tools & Workflow: Git & GitHub, Git Bash, Postman / Thunder Client, Agile & Scrum, Jira/Trello, Deployment (Vercel, Hugging Face, Cloudinary)

WORK EXPERIENCE

Full-Stack Developer (MEAN Stack), Freelance / Personal Projects | Jan 2024 – Present

- Engineered scalable web applications and 2 comprehensive e-commerce platforms using the MEAN stack (Angular, Node.js, Express.js, MongoDB) for robust application development.
- Architected server-side product management systems handling over 500+ inventory items, featuring shopping carts with soft-delete/restore flows.
- Designed highly responsive user interfaces and implemented secure authentication and authorization protocols (JWT, RBAC) to secure 100% of user sessions.
- Optimized complex MongoDB queries by leveraging population for deeply nested document structures, significantly enhancing data retrieval performance by up to 35%.
- Deployed interactive frontend applications to GitHub Pages and configured reliable backend Node.js servers via Heroku, achieving 99% system availability.
- Orchestrated seamless deployment pipelines using Git/GitHub workflows, managing secure environment variables and testing 50+ REST API endpoints via Postman/Thunder Client.

MEAN-Stack Developer Trainee, National Telecommunication Institute (NTI) | Jul 2025 – Sep 2025

- Collaborated within a 5-member Agile/Scrum team to design and deliver comprehensive capstone projects, adhering to industry standards in clean code practices.
- Completed a 3-month intensive training program covering Angular for responsive user interfaces, and Node.js/Express.js for server-side API development.
- Resolved over 40 complex software bugs during rigorous testing phases, strengthening overall application stability and foundational Git workflows.

EDUCATION

Bachelor of Computer Science, 6 October University | Sep 2022 – Jun 2026

6 October - El-Hosary

- GPA: 3.4 / 4.0.
- Specialized in Software Engineering with focus on web development and database systems.

UI/UX Design Certification, ROUTE | Mar 2024

Giza - Al Dokki

- Certified in UI/UX principles, system design, and scalable product deployment.

PROJECTS

DELMA | Medical Supplies E-Commerce | May 2025 – Jul 2025

Angular, Node.js, MongoDB

- Developed a robust B2B digital storefront tailored specifically for medical and laboratory materials, successfully cataloging 100+ specialized products.
- Formulated an advanced shopping cart system tracking 3 distinct delivery phases (pending, shipped, delivered) alongside complex state management.
- Integrated multi-tiered user permissions to strictly isolate administrative workflows from public user interfaces.

Wasel | Hypermarket Management System | Apr 2025 – Jun 2025

MEAN Stack (Angular, Node.js, Express.js, MongoDB)

- Architected a full-scale hypermarket management system and online store handling real-time data for over 5,000+ inventory units and payment simulations.
- Developed a comprehensive Admin Dashboard and an accompanying Mobile App (APK) with intuitive user interfaces to manage 15+ nested product categories via full CRUD operations.
- Optimized backend performance by utilizing efficient MongoDB aggregation pipelines, decreasing API response times by 30% across extensive product catalogs.

VulnCraft | Cybersecurity Platform | Feb 2025 – Apr 2025

Angular, Node.js, Python, FastAPI, MongoDB, Vercel, Hugging Face

- Engineered a complete full-stack cybersecurity platform (vulncraft.software), developing a highly responsive Angular frontend and an Admin Dashboard to manage 100% of automated vulnerability scans.
- Integrated 5+ native Python scripts and an independent FastAPI bridge to handle advanced security operations, accelerating SQL injection testing and rate-limiting analysis.
- Deployed the complete application, configuring custom DNS routing variables and managing seamless hosting migrations to Hugging Face spaces and Vercel with zero downtime.
